3 FAT QUARTER BUNDLE 100% COTTON
PATCHWORK CRAFT FABRIC ~ BLUE FLORAL

15-100x 100% Cotton Patchwork Quilt Craft
Fabric Scraps Remnant Value Bundles O/

Materials and templates

step 1

Hello all!

I thought it would be a good idea to create a simple guide to help you make your own masks at home!

If you have been at home like me you have probably watched many videos on how to make masks – some are straight forward and some are needlessly complicated: hopefully you will find this easy to follow 😊

step 2

step 3

1 – if you are buying fat quarters you will need to trim them into squares first:
16cm squares to make extra large masks for rounder faces or bearded men
15cm squares to make a men's or large masks
14cm squares to make women's or medium masks
13cm squares to make kids or small masks

Step 1: each mask will need 4 squares and you can choose 2 patterns per side:
Place 2 squares of your choosing with the patterns facing
Step 2: use your cake wedge template to mark the outline of your mask
Step 3: use a pencil or a pen that has a similar colour to your pattern

Sew the arch alongside the marking and trim the excess cloth

Repeat these steps for your other squares of a different pattern

Once trimmed place the 2 wedges one inside the other with the front of the masks facing and the backs facing outwards - you are sewing inside out.

You will see why on the next page

Step 4

Step 5

Step 6

Now sew the sides of the masks where the 2 sides of the masks meet.

Follow your pen/pencil markings and leave a 4cm space unsewn (shown in step 7).

Once you have sewn all 4 sides you will have a fully sewn mask (inside out) with the corners left unsewn

You can now pull the material through the unsewn gaps to turn the mask the right way around.

Tuck in the tips of your corners and now you can sew in your elastic.

Step 7

Step 8

Step 9

Step 10

Cut the elastic bands to a suitable and comfortable length based on the size of the mask and your head!

15 to 20cm per side

Secure the elastic band and try the mask on as it needs to be tight but not so much that it hurts your ears

Once you are happy with the length, sew it inside the corners with transparent thread or cotton thread of your choosing and then you are FINISHED! You have your own home-made washable face mask!!!

Thank you for your time!

I bought all the materials from Ebay:

there is a world of choice and the pictures on the second slide is what I have bought myself. The lovely people on the first slide are my willing victims wearing the masks I made for them.

*** It is fun to do**

***Cheap to make yourself,**

the average homemade mask cost less than £1 to make

***You are not adding more waste to landfill**

by wearing a disposable mask that ends up in the bin after a couple of hours
